Subject: Journal Suggestions for the 4 Parthenon manuscripts

Hi Alice,
Below are the 4 Parthenon manuscripts and the journal suggestions based on our discussions at the TMG Publication meeting. It may still be wise to have a meeting next Monday to ensure that these are moving forwards.
Once I have the word that Linda is okay with the journal selections, I'll pass that to Dave Dubinski. I will also ask Dave to get Parthenon to provide a weekly update on the status of these 4 manuscripts. Also attached is an excel worksheet showing in which journals HT trials are being published. This analyses was done using a search for RCTs and HRT in Medline. This may be useful for Linda to see where HT trial data has been published. Regards, Andy <<Menopause journals overview.xls>>
PC(1)
A study of the efficacy of continuous combined regimens of 1mg estradiol and trimegestone compared with regimens containing estradiol and norethisterone acetate in postmenopausal women for up to 2 years
Authors: Gambacciani M, Spielmann D, Genazzani A, and the Trimegestone 301 Study Group.
Journal suggestion: Menopause

PC(2)
A comparison of the effects of continuous combined regimens of 1 mg estradiol and trimegestone with regimens containing estradiol and norethisterone acetate upon the profiles of endometrial bleeding and safety in postmenopausal women for up to 2 years
Authors: Bouchard P, Addo S, Spielmann D, and the Trimegestone 301 Study Group. Journal suggestion: Climacteric

PS(1)
A study of the control of climacteric symptoms in postmenopausal women following sequential regimens of 1 mg estradiol and trimegestone compared with a regimen containing estradiol and norethisterone over a period of 2 years
Authors: Same as Berlin Poster
Journal suggestion: Maturitas

PS(2)
A comparative 2-year study of the effects of sequential regimens of 1 mg estradiol and trimegestone with a regimen containing estradiol and norethisterone upon the patterns of endometrial bleeding and safety in postmenopausal women.
Authors: Same as Berlin Poster
Journal suggestion: Gynecological Endocrinology
